Parallel Session 2A – Smart Solutions for Stations

Making Railway Stations Smart about sensors, data and service quality

Oliver Brandmüller Deutsche Bahn IoT Project Lead

UIC next station

DB Station&Service AG

We build and operate Railway Stations

Our IoT Projects

Existing Assets

- Elevators & Escalators
- Train Station Clocks
- Lighting

IoT from Scratch

- Ice Sensors
- Pax Counting

ADAM: elevators made smart

- Over 3000 Installations
- Developed inhouse
- Works with every Elevator
- Uses Mobile Network
- Open Data

The Station Clock talks back

- Replace expensive time sync
- Device Monitoring
- Sensor Hub
- LoRaWAN IoT Network
- Development w/
 - Clock Manufacturer
 - IoT H/W Engineers
 - Software Engineers

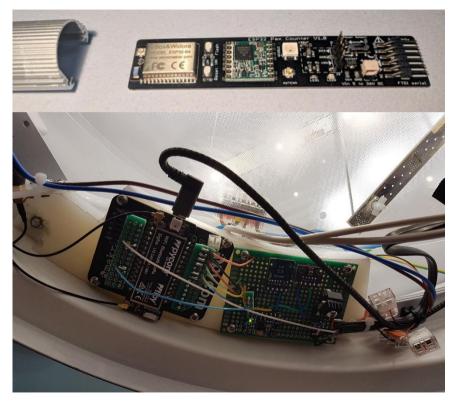

Passenger Flow Metering everywhere

What

- WiFi
- Cameras
- Sensor Mats

Where

- LED Tubes Retrofitting
- Station Clock

Upcoming: Ice Sensors

- Detect Ice, Snow, Hail
- Schedule staff
- Better Service Quality
- Increase Efficiency

Our Goal is Data Driven Operations

Understand your stations

Do better planning

- (Re)Act in Realtime
- Predictive maintenance

- Enhance customer experience
- Improve Service Quality
- Efficiency

Oliver Brandmüller **DB**

IoT Project Lead, DB Station&Service AG, Germany Oliver.Brandmueller@deutschebahn.com

Thank you for your kind attention
